

Deutsche Akkreditierungsstelle GmbH

Annex to the Accreditation Certificate D-PL-21095-01-00 according to DIN EN ISO/IEC 17025:2018

Valid from: 13.05.2020 Date of issue: 13.05.2020

Holder of certificate:

DIK Prüfgesellschaft mbH Eupener Straße 33, 30519 Hannover

Tests in the fields:

mechanical-technological and chemical tests as well as determination of temperature-dependent properties of rubber and plastics as well as determination of N-nitrosamines

Within the given testing field marked with $1^{1}/2^{1}$ the testing laboratory is permitted, without being required to inform and obtain prior approval from DAkkS, the following:

- ¹⁾ the free choice of standard or equivalent testing methods.
- ²⁾ the modification, development and refinement of testing methods.

The listed testing methods are exemplary. The testing laboratory maintains a current list of all testing methods within the flexible scope of accreditation.

This document is a translation. The definitive version is the original German annex to the accreditation certificate.

Abbreviations used: see last page

The certificate together with its annex reflects the status at the time of the date of issue. The current status of the scope of accreditation can be found in the database of accredited bodies of Deutsche Akkreditierungsstelle GmbH. https://www.dakks.de/en/content/accredited-bodies-dakks

1 Mechanical-technological tests ¹⁾

1.1 Hardness test

DIN ISO 48 2016-09	Rubber, vulcanized or thermoplastic - Determination of hardness (hardness between 10 IRHD and 100 IRHD) (here: <i>only method M - Micro hardness test</i>)
	Rubber, vulcanized or thermoplastic - Determination of indentation hardness - Part 1: Durometer method (Shore hardness)

1.2 Rheological test

DIN 53529-2 1983-03	Testing of rubber and elastomers; measurement of vulcanization characteristics (curometry); evaluation of cross-linking isotherms in terms of reaction kinetics
DIN 53529-3 1983-06	Testing of rubbers; curemetry; types and applications of rotorless curemeters
ISO 6502-3 2018-07	Rubber - Measurement of vulcanization characteristics using curemeters - Part 3: Rotorless curemeter

1.3 Physical properties test

DIN 53512 2000-04	Testing of rubber - Determination of rebound resilience (Schob pendulum)
DIN ISO 815-1 2016-09	Rubber, vulcanized or thermoplastic - Determination of compression set - Part 1: At ambient or elevated temperatures
DIN ISO 4649 2014-03	Rubber, vulcanized or thermoplastic - Determination of abrasion resistance using a rotating cylindrical drum device (here: <i>only method A</i>)
DIN EN ISO 1183-1 2019-09	Plastics - Methods for determining the density of non-cellular plastics - Part 1: Immersion method, liquid pycnometer method and titration method (here: <i>only method A</i>)

Annex to the accreditation certificate D-PL-21095-01-00

ISO 4662	Rubber, vulcanized or thermoplastic - Determination of rebound resilience
2017-06	

1.4 Tensile test

DIN 53504 2017-03	Testing of rubber - Determination of tensile strength at break, tensile stress at yield, elongation at break and stress values in a tensile test
DIN ISO 34-1 2016-09	Rubber, vulcanized or thermoplastic - Determination of tear strength - Part 1: Trouser, angle and crescent test pieces
ISO 37 2017-11	Rubber, vulcanized or thermoplastic - Determination of tensile stress-strain properties

1.5 Flow behaviour test

DIN ISO 289-1	Rubber, unvulcanized - Determinations using a shearing-disc viscometer -
2018-12	Part 1: Determination of Mooney viscosity
DIN ISO 289-2	Rubber, unvulcanized - Determinations using a shearing-disc viscometer -
2018-12	Part 2: Determination of pre-vulcanization characteristics

1.6 Accelerated ageing test

DIN 53508 2000-03	Testing of rubber - Accelerated ageing
ISO 188 2011-10	Rubber, vulcanized or thermoplastic - Accelerated ageing and heat resistance tests

1.7 Chemical resistence test

DIN ISO 1431-1	Rubber, vulcanized or thermoplastic - Resistance to ozone cracking - Part 1:
2017-04	Static and dynamic strain testing
DIN ISO 1817 2016-11	Rubber, vulcanized or thermoplastic - Determination of the effect of liquids

2 Determination of temperature-dependent properties ²⁾

2.1 Thermoanalytical tests of elastomers and plastics using differential scanning calorimetry (DSC) E DIN EN ISO 11357-2 Plastics - Differential scanning calorimetry (DSC) - Part 2: Determination of 2019-03 glass transition temperature and glass transition step height DIN EN ISO 11357-3 Plastics - Differential scanning calorimetry (DSC) - Part 3: Determination of temperature and enthalpy of melting and crystallization 2018-07 AA-3.2.1.3 Determination of thermodynamic properties of elastomers and polymers Version 1 using DSC 2019-08

2.2 Thermoanalytical tests of elastomers and plastics using thermogravimetric analysis (TGA)

DIN EN ISO 11358-1 2014-10	Plastics - Thermogravimetry (TG) of polymers - Part 1: General principles
AA-3.2.1.4 Version 1 2019-08	Thermogravimetric analysis (TGA) of elastomers and polymers
PV 3927 2017-11	Thermogravimetry for plastics and elastomers - Determination: plasticizer, carbon black

3 Chemical test

3.1 Sample preparation for the determination of leachable/extractable components from polymer materials with evaluation of recovery rates²⁾

AA-3.4.1.3 Version 1 2019-07	Extractions of filter elements and capsules with pharmaceutical solutions or surrogates/model solutions
AA.3.4.1.4 Version 1 2019-07	Preparation of eluates and extracts of polymer materials used in the pharmaceutical and food sector for the subsequent analysis

DAKKS Deutsche Akkreditierungsstelle

Annex to the accreditation certificate D-PL-21095-01-00

3.2	Determination of the wavenumber for identification of organic substances in polymer materials as well as eluates and extracts of polymer materials using infrared spectroscop (FT-IR) ²⁾	
AA-3.2. Version 2019-08	1	Infrared spectroscopic analysis of substances of elastomeric and polymer materials in transmission
AA-3.2. Version 2019-08	1	Infrared spectroscopic analysis of elastomers and polymers using ATR-technique
AA-3.4. Version 2019-07	1	Infrared spectroscopic analysis of eluates and extracts of polymer materials in transmission

3.3 Determination of the mass fraction or the mass concentration of soluble components/non-volatile residues in rubber and elastomers as well as eluates and extracts of polymer materials by gravimetry ²⁾

ISO 1407 2011-12	Rubber - Determination of solvent extract (here: <i>only method B</i>)
AA-3.4.1.2 Version 1 2019-08	Determination of non-volatile residue (NVR)

3.4 Determination of the retention time and the UV-/Vis- spectra for identification of organic substances as well as determination of their mass fraction or mass concentration in eluates and extracts of polymer materials using high performance liquid chromatography with standard detector (HPLC-UVD)²

AA-3.4.1.5 Version 1 2019-07	HPLC-UV screening analyses of eluates and extracts of polymer materials used in the pharmaceutical and food sector
AA-3.4.1.6 Version 1 2019-08	Peak identification and semi-quantification of substances in eluates and extracts of polymer materials by HPLC-UV analysis

Annex to the accreditation certificate D-PL-21095-01-00

3.5 Determination of the retention time and the UV-/Vis- and mass spectra for identification of organic substances in eluates and extracts of polymer materials using high performance liquid chromatography with mass selective detector (HPLC-UVD-MSD)²⁾

AA-3.4.1.12 Qualitative testing by HPLC-UV-MS analyses of eluates and extracts with Version 1 LCQ 2019-12

3.6 Determination of the retention time and the mass spectra for identification of organic substances as well as determination of their mass fraction or mass concentration in polymer materials as well as eluates and extracts of polymer materials using gas chromatography with mass selective detector (GC-MSD)²

AA-3.4.1.7 Version 1 2019-08	Qualitative GC-MS analyses of eluates and extracts of polymer materials used in the pharmaceutical and food sector
AA-3.4.1.8 Version 1 2019-08	Semi quantification of identified components in eluates and extracts of polymer materials using internal standards by GC-MS analysis
AA-3.4.1.9 Version 1 2019-08	Headspace-GC-MS analyses of eluates and extracts of polymer materials used in the pharmaceutical and food sector
AfPS GS 2019:01 PAK 2019-05	GS Specification - Test and assessment of Polycyclic Aromatic Hydrocarbons (PAHs) in the awarding of GS Marks (here: <i>Annex Test instructions</i>)

4 Determination of N-nitrosamines ²⁾

4.1 Determination of the absolute mass or mass concentration of N-nitrosamines in ambient air on solid collection phases by gas chromatography with selective detector (GC TEA)

AA-3.3.1.2 Version 1 2019-11	Determination of N-nitrosamines in ambient air on solid collection phases using GC-TEA
DGUV I 213-523	Method for the determination of N-nitrosamines
Verfahren 5-GC	Method 5: Gas chromatography with TEA detector after elution with
2019-09	dichloromethane/methanol

Annex to the accreditation certificate D-PL-21095-01-00

IFA 8172 Lfg. 1/2018 IV 2018		N-Nitrosamines, aliphatic and cycloaliphatic - Gas chromatographic measurement method for determination of the concentration of aliphatic and cycloaliphatic nitrosamines in the workplace air		
4.2		of the mass fraction of N-nitrosamines in consumer products of elastomers vell as polymer matrices by gas chromatography with selective detector		
DIN EN 2017-0		Child use and care articles - Method for determining the release of N- nitrosamines and N-nitrosatable substances from elastomer or rubber teats and soothers		
AA-3.3. Versior 2019-0	n 1	Determination of N-nitrosamines by methanol extraction in polymer matrices using GC-TEA
